1	Search Based Applications	1
1.1	Introduction	1
1.1.1	What is a Search Based Application?	2
1.2	High Impact, Low Risk Solution for Businesses	4
1.3	Fertile Ground for Interdisciplinary Research	4
1.4	A Valuable Tool for Database Administrators	5
1.5	New Opportunities for Search Specialists	6
1.6	New Flexibility for Software Developers	6
1.6.1	Lecture Roadmap	6
2	Evolving Business Information Access Needs	7
2.1	Changing Times	7
2.2	The Need for High Performance and Scalability	8
2.3	The Need for Unified Access to Global Information	8
2.4	The Need for Simple Yet Secure Access	9
3	Origins and Histories	11
3.1	Search Engines	11
3.2	Databases	13
3.3	What has Changed Recently	13
3.3.1	Search Engines Enter the Enterprise	14
3.3.2	Databases Go Online	15
3.3.3	Structural and Conceptual Changes	16
4	Data Models & Storage	17
4.1	Search Engines	17
4.1.1	Conceptual Data Model	17
4.1.2	Data Storage	17

	4.1.3 Storage Framework	18
4.2	Databases	19
	4.2.1 Conceptual Data Model	19
	4.2.2 Data Storage	20
	4.2.3 Storage Framework	21
4.3	What has Changed Recently	23
	4.3.1 Search Engines	23
	4.3.2 Databases	23
5	Data Collection/Population	29
5.1	Search Engines	29
	5.1.1 Collection	29
	5.1.2 Updating	29
5.2	Databases	30
	5.2.1 Creation/Collection	30
	5.2.2 Updating	31
5.3	What has Changed	31
	5.3.1 Search Engines	31
	5.3.2 Databases	32
6	Data Processing	35
6.1	Search Engines	35
	6.1.1 Natural Language Processing	35
	6.1.2 Relevancy Criteria	37
6.2	Databases	37
6.3	What has Changed	37
	6.3.1 Search Engines	37
	6.3.2 Databases	42
7	Data Retrieval	43
7.1	Search Engines	43
	7.1.1 Querying	43
	7.1.2 Output	44
7.2	Databases	44
	7.2.1 Querying	44
	7.2.2 Output	45
7.3	What's Changed?	45

	7.3.1 Search Engines	45
	7.3.2 Databases	49
8	Data Security, Usability, Performance, Cost	51
	8.1 Search Engines	51
	8.2 Databases	51
	8.3 What has Changed	52
	8.3.1 Search Engines	52
9	Summary Evolutions and Convergences	57
	9.1 SBA-Enabling Search Engine Evolutions	57
	9.1.1 Data Model	58
	9.1.2 Data Storage	58
	9.1.3 Data Collection	58
	9.1.4 Data Processing	58
	9.1.5 Data Retrieval & Output	59
	9.1.6 Data Security, Usability, Performance, Cost	59
	9.2 Convergence	59
10	SBA Platforms	61
	10.1 What is an SBA Platform?	61
	10.2 Information Access Platforms	62
	10.3 SBA Platforms: Market Leaders	62
	10.4 SBA Platforms: Other Vendors	64
	10.5 SBA Vendors: COTS Applications	66
11	SBA Uses & Preconditions	69
	11.1 When Are SBAs Used?	69
	11.2 How Are SBAs Used?	70
12	Anatomy of a Search Based Application	71
	12.1 SBAs for Structured Data	71
	12.1.1 Data Collection	71
	12.1.2 Data Processing	72
	12.1.3 Data Updates	73
	12.1.4 Data Retrieval & Analysis	74
	12.2 SBAs for Unstructured Content	77

	12.2.1 Data Collection	77
	12.2.2 Data Processing	77
	12.2.3 Data Updates	78
	12.2.4 Data Retrieval & Analysis	78
	12.3 SBAs for Hybrid Content	79
13	Case Study: GEFCO	83
	13.1 Background	83
	13.2 A Track & Trace Solution	83
	13.3 Existing Drawbacks	83
	13.4 Opting for a Search Based Application	84
	13.5 First prototypes	85
	13.6 Deployment	86
	13.7 Future	87
14	Case Study: Urbanizer	89
	14.1 Background	90
	14.2 The Urbanizer Solution	91
	14.3 How Urbanizer Works	91
	14.4 What's Next	91
15	Case Study: National Postal Agency	95
	15.1 Customer Service SBA	95
	15.1.1 Background	95
	15.1.2 Deployment	96
	15.2 Operational Business Intelligence (OBI) SBA	97
	15.2.1 Background	97
	15.2.2 Deployment	98
	15.3 Sales Information SBA for Telemarketing	98
	15.3.1 Background	98
	15.3.2 Deployment	98
16	Future Directions	103
	16.1 The Influence of the Deep Web	104
	16.1.1 Surfacing Structured Data	104
	16.1.2 Opening Access to Multimedia Content	105
	16.2 The Influence of the Semantic Web	105

16.3	The Influence of the Mobile Web	106
16.3.1	Mission-Based IR	106
16.3.2	Innovation in Visualization	106
16.4	...And Continuing Database/Search Convergence	106
	Bibliography	109
	Authors' Biographies	115
